

An appeal to send contributions to LUCC atlas

Dear colleagues, ladies and gentlemen. We are addressing you with a request to send a contribution to another Atlas of the LUCC (Land Use/Cover Changes in Selected Regions in the world: Volume IX. IGU/LUCC, Faculty of Science, Charles University in Prague and Hokkaido University of Education, Asahikawa) published by the LUCC/IGU commission. This is a publication thanks to which one can publish the basic results of your work with a focus on the transformation of land use in a variety of methods. The extent of the contribution should be roughly 10 pages of the text (A4) and 10 pages of coloured graphic supplements (maps, charts, photos, etc.) in the highest possible quality of resolution. Please send the contributions written by you or your collaborators to the address of the editor of this volume of the LUCC Atlas (Volume XIII: bicik@natur.cuni.cz). The atlas will be released in tens of volumes in the A3 format and it will be also posted on the webpage of the IGU/LUCC and geography.cz. Since the publication is fully in colour and in English, one can obviously expect, similar to the previous volumes, a substantial international impact and citations of the published contributions in the articles of renowned journals.

If you are interested in the publication, please let me know at my e-mail address and I will send you an extract from a previously published Atlas.

Ivan Bičík
